Changelog

What changed between the submitted v0.9.18 and v0.12.0, and which review drove it.

HISTORY

Versions

VERSION	DATE	STATUS	SUMMARY
v0.9.18	Sept 2026	Submitted	Influence-and-timing design around a Records Office extraction. Reviewed by the AI reviewer on GitHub, a peer and the course instructor.
v0.10.18	26 Sep 2026	Draft	Fixed the four rule gaps the AI reviewer found.
v0.11	29 Sep 2026	Draft	First game-first rewrite for the instructor: the Vale kidnapping and the long-chain fantasy. Recovered copy.
v0.12.0	30 Sep 2026	Current	Game-first redesign: a four-person cell, priced approaches, Standing, escalating fights, generated content. Ships as a 6-page submission, the full GDD and a 7-page agentic design document.

REVIEW

What review changed

All three reviews were of the submitted v0.9.18. A peer helped talk through the game concepts. The other two led to the changes below.

Course instructor: less manual, more game

The GDD read too much like a manual. It needed to show the game and the excitement of how it plays.

PROBLEM	CHANGE IN V0.12.0
The build led; the game came later.	Sections 01–08 are what you play. The build and the agent crew come after. In the 6-page submission, pages 1–4 are the game.
Too technical for a design document.	Plain language throughout. Schemas, file formats and the test plan moved to the agentic design document.
Agent names were confusing.	The crew is listed by job first, name second (Systems designer · Motive).

AI reviewer on GitHub: four gaps in the rules

Fixed in v0.10.18 and still in place in v0.12.0.

GAP	FIX
The proof carried too much; its goal and ending were hard to test.	One focused mission with an explicit win and fail.
Time pressure had no source.	Each mission has a closing event: Vale leaves at handover.
Nothing in the city pushed back except the player.	A rival crew pursues its own goal on the same clock.
An action couldn't be traced to its result.	Every event states what it needs, what it changes and who sees it. Any run replays exactly.

AT A GLANCE

v0.9.18 → v0.12.0

AREA	V0.9.18	V0.12.0
Promise	Influence people, then time their actions	Same pillars, one arc: **start with one waitress, end with the city**
First mission	Extract a record from the Records Office	**Handover**: take Councillor Vale alive, by one of two routes
Player side	One field operative	A four-person cell: Scout, Fixer, Tech, Enforcer
Influence	One lever, checked against trust	Four priced approaches; knowledge makes consent cheap
Consequence	People remember; exposure undefined	Alert, Trail and district Standing (Hero ↔ Menace)
Pressure	A shared clock	Closing events, a rival crew, escalating fights
Economy	None	Cash, Arms and Assets from turned people
Content	Hand-authored	Generated at build time and checked; no AI during play
Proof	Top-down 2D, planned	Top-down test built (28 scenarios pass); 2.5D Unity scene next
